## PROFESSIONAL SUMMARY

---

## Work Experience

### The Bulb Africa   - Frontend Engineer (Contract)                September 2023 - Present
At The Bulb Africa where i worked for Sterling Bank I:

- Developed and maintained a loan configuration and disbursement application that resulted in a 20% increase in processing efficiency.
- Collaborated with a cross-functional team of 15 developers, 2 designers, and 3 stakeholders to design, develop, and enhance the application, leading to a 15% improvement in overall user satisfaction.
- Utilized front-end technologies such as HTML, CSS, and JavaScript (Typescript) to create a seamless user experience, contributing to a 90% reduction in error rate.
- Conducted thorough testing and debugging, identifying and resolving 98% of reported issues, ensuring a near bug-free user experience.
- IIncorporated advanced form & data validation with security measures, resulting in a 90% decrease in data-related security incidents and ensuring compliance with industry standards
- Worked with the back-end development team to ensure seamless integration, reducing data transfer latency by 40% between the front-end and back-end systems.
- Successfully delivered a user-friendly and efficient loan disbursement application (Sterling RetailCore) that met the company's goals and exceeded customer expectations, resulting in a 100% pass rate.

### ICE SOLAR Commercial Power -  Frontend Engineer                September 2022 - Present
At ICE Commercial Power I:

- Cooperated with product managers, QA team, UI/UX designers and Backend engineers in developing and shipping various features on the Web Application within a 6 sprint period.
- Implemented features and fixed bugs on the Web Apps, using ReactJs, Redux Toolkit, SCSS and Azure Terraform
- Facilitated the integration of Credit Line financing sponsored by Microsoft, which helped more communities in 4 states to power their SME's businesses being run on solar power
- Partnered with the Microsoft CSE Team to deliver the Catalyst admin dashboard used to approve or disapprove loans for SME's with over 25 ICE solar microgrids installed
- Integrated search and filter functionality on the Catalyst admin dashbaord that was used to identify and sort over 10,000 loan request
- Eliminated unnecessary page reload upon KYC verification using global state management which helped accelerated the performance of the web application by up to 3 times
- Participated in sprint demos, while making sure that all feedbacks from stake-holders are captured and resolved
- Transformed the company's old website to a new, revamped and updated modern website design

### Lorem Excellentiam Services -  Frontend Developer                October 2021 - September 2022
At Lorem Excellentiam Services I pioneered two solid projects which are:

#### _TestAssessify_

- Collaborated with the scrum team of 12 to translate client requirements into implementable user stories
- Reduced human error in assessing job applicants for Access Bank from 50% to 0.6%
- Effected the app delivery time by 10% through code reviews and collaborating with QA testers
- Achieved over 60,000 registration on the app
- Scaled the app to reduce the load and codebase function by 15%
- Spearheaded the developement phase of creating a Personality, Integrity and Typing Test for assessing candidates in a 3 month sprint
- Boosted coding efficiency by 30% by identifying and fixing process bottlenecks
- Created a billing functionality that brought in 40 million Naira within a 4-month period

---

### *SteamFest*

- Incorporated UI designs into code and deployment on a live server
- Completed an admin dashboard to search view and track number of over 15,000 attendees for the festival
- Launched a user dashboard to view and download unique QR code generated for guests in attendance
- Invented a unique PDF Badge for 4000 guardians to be scanned upon entry on event day

## PEREGRIN WEB SERVICES -

June 2020 - October 2021

### At PEREGRIN WEB SERVICES I:

- Optimized web pages for maximum speed and scalability
- Analyzed, redesigned and built design mock-ups to code
- Built reusable code for future use

---

## EDUCATION

University of Ilorin, Ilorin

B.Sc Physics | 2014 - 2019

---

## CERTIFICATIONS

**FreeCodeCamp  -**
Responsive Web Design
JavaScript Algorithms and Data Structures
**Educative Inc. -**
Advanced React Patterns With Hooks

## SPECIALIZATIONS

HTML
CSS
SASS
Javascript
React Js
Rest API's
Git
Micro frontend

---

## PORTFOLIO

My Portfolio Page

## OTHER SKILLS

Great Communication Skills
Ability to analyze complex technical information

## JS FRAMEWORKS & LIBRARIES

React.js,
Next.js,
Redux,
ReduxToolKit,
GraphQL,
Apollo Client,
Axios (Rest APIs)

---

## VERSION CONTROL

GitHub
Gitlab
Azure Devops

## PROJECT MANAGEMENT

Trello
Jira
Slack
Azure Board

---

## UI FRAMEWORKS & LIBRARIES

TailwindCss
Chakra UI
Ant Design
Bulma
Bootstrap

## OTHERS

Jest (Unit Testing)
Strapi CMS,
Netlify
Figma
